Christian McFarland

Wilmington, NC | (910) 352-3368
christianmcfarland@gmail.com

Summary

Full-stack engineer with 8+ years building and modernizing production web applications across healthcare, SaaS, and B2B ecommerce. Deep experience across React, Vue 3, Next.js, Node.js, and PostgreSQL, with a track record of owning projects end-to-end, from architecture and data modeling through deployment and client support. Daily user of AI-assisted development tools (Claude Code, Codex) to increase throughput without sacrificing code quality or review standards.

Experience

Self Employed | Remote
Full Stack Engineer | 08/2024 - Present

- Design, build, and maintain full-stack web applications using React, Next.js, and TypeScript, styled with Tailwind CSS and styled-components.
- Architect backend logic using Next.js Server Actions and Drizzle ORM against PostgreSQL (hosted on Neon), with Zod for schema/form validation.
- Implement authentication with Better Auth and write unit tests with Vitest as part of the development workflow.
- Deploy via Vercel with automated CI/CD from GitHub; manage the full project lifecycle from requirements gathering through deployment and client support.
- Integrate AI-assisted development tools (Claude Code, Codex) daily to accelerate code generation, debugging, and testing while maintaining code quality and review standards.

CareValidate, Inc. | Remote
Front End Developer | 02/2023 - 01/2024

- Built and supported a production SaaS application end-to-end using Vue 3 (Composition API, Pinia) with SCSS and Quasar on the frontend, and Express with Prisma and Apollo/GraphQL on the backend.
- Delivered an HR accommodations request platform featuring role-based permissions (requester vs. reviewer), document upload, and secure sharing with third-party reviewers (e.g., medical professionals), improving processing speed and audit clarity.
- Wrote unit tests with Jest across both frontend and backend; contributed to CI pipelines via GitHub Actions.
- Worked in 2-week Agile sprints with daily standups; enforced a 2-approval code review policy via GitHub branch protection.

ANDMORE (formerly International Market Centers) | Remote
Front End Developer | 03/2020 - 11/2022

- Delivered front-end features for a large B2B ecommerce ecosystem using Vue 3 (Composition API, Pinia) and custom SCSS, translating Figma designs into production UI and integrating REST APIs (Swagger/OpenAPI).
- Built and maintained a shared Vue component library using Storybook and Rollup.js, published to a private npm registry with semantic versioning and consumed as a package across multiple production applications.
- Built and enhanced a "Super Admin" internal dashboard/reporting platform unifying multiple products behind OIDC single sign-on.
- Wrote unit tests with Vitest and collaborated closely with a dedicated QA team handling E2E and smoke testing, as part of a cross-functional team of 2 frontend, 2 backend, PM, scrum master, and QA (one of 4-5 similarly structured teams).

RepZio, LLC | FL, Juno Beach
Front End Developer | 02/2019 - 03/2020

- Led a live migration of a production Vue 2 application (Options API, Vuex) to Vue 3 (Composition API, Pinia) with zero downtime for active customers.
- Rebuilt a legacy CMS into a modern, white-labeled drag-and-drop page builder with live preview, supporting basic elements (text, buttons, images) and composite components.
- Built a sales commissions application from the ground up against a .NET Core REST API, supporting complex nested commission logic based on product line, region, customer type, deal size, manual overrides, and bonus commissions.
- Used Postman for API testing/debugging against in-progress backend endpoints; version control via Git (Bitbucket, later GitHub); CI/CD and project tooling via Azure DevOps.

Origin Code Academy | CA, San Diego
Instructor | 11/2017 - 12/2018

- Built an in-house Learning Management System using the MERN stack (MongoDB, Mongoose, Express, React, Node.js) with Redux for state management and JWT-based authentication, supporting course progress, attendance, and student workflows.
- Independently designed, built, and deployed a Node.js/Express barcode check-in system with a companion Python script running on a Raspberry Pi to log real-time attendance events.
- Owned the LMS project solo in its early stages, later growing the codebase with 2 additional contributors; deployed via Heroku with CI/CD through GitHub.

LanTrax, Inc. | NY, Buffalo
Front End Developer | 11/2016 - 11/2017

- Built internal applications in Visual Studio using VB.NET, HTML/CSS, Bootstrap, and vanilla JavaScript/jQuery, using Gitfor version control.
- Wrote and optimized complex SQL Server queries and reports using SSMS and SSRS to support day-to-day business operations.
- Maintained a mission-critical email ingestion pipeline using complex regular expressions to normalize inbound messages into structured data, adapting patterns as source formats changed without notice.

Skills

JavaScript, TypeScript, React, Vue, Next.js, Node.js, Express, HTML, CSS, Tailwind, SCSS, Redux, Pinia, REST, GraphQL, SQL, PostgreSQL, MongoDB, Prisma, Drizzle, Jest, Vitest, Testing Library, Git, GitHub Actions, CI/CD, Agile Software Development, Scrum Software Development
